

# GEMCOM MINESCHED™ DEVELOPMENT AND PRODUCTION SCHEDULING.

At Gemcom Software we recognise that our clients often need to start using our products quickly and therefore we have developed a series of courses that are aimed at getting you familiar with the essential functions that you are most likely to need. The courses are also ideal for potential clients who want to evaluate the capability of our products. Whilst not as detailed as our personalised training courses (please ask for details) our Quick Start series will allow you to develop solutions from the outset.

The MineSched Development & Production Workshop is a comprehensive three-day workshop, amalgamating both the Development and Production Workshops into one. It is designed for users new to the use of MineSched production and development scheduling capability.

## Course Prerequisites

Before taking this course, you require the following:

- Knowledge of Windows® 2000, XP, Vista® or Windows 7 Operating System
- Knowledge of file management
