Gemcom Services

When you don't have the time or in-house resources available, Gemcom can assist you with your geology, engineering and operations needs. Our global team of Engineers, Geologists, Surveyors, Metallurgists and Chemists have local language and regional expertise. We can provide you with knowledge and tools that enable you to increase operational and personal productivity. Typical assignments include data management, geological modelling, resource estimation, design and optimisation, strategic mine planning, scheduling, survey, grade control, blast design, reconciliation, workflow automation, system configuration, training and points in between. Learn more: www.gemcomsoftware.com/services.
