

MODULES OVERVIEW

STANDARD FEATURES	
3D Graphics Display	Sophisticated and powerful 3D modelling environment.
Plotting	Create, preview, annotate and print user-defined plots.
CAD Tools	Create and work with point and line data.
Surface Modelling	Create and work with wireframe surfaces and sub-surfaces.
Scripting and Automation	Record / playback macros and write custom workflows.
Language Support	English, Chinese, Russian, Spanish, German and French.
Online Help/Tutorials	Documentation, examples, tutorials and data.

OPTIONAL MODULES		
TOOLS	Autoplot	Quick plots to scale with basic user-defined options.
	Data Plug-ins	Read and exchange data with multiple geoscience applications.
	String File Reports	String data file manipulation toolkit.
SYSTEM	Network License Manager	Share and manage licenses across the network.
GEOLOGY	Geological Drillhole Database	Manage, query and display drill hole and assay information.
	Basic Statistics	Tools for general data analysis, min, max, mean.
	Geostatistics	Tools for trend analysis, variogram modelling and validation.
	Solids Modelling	Create wireframes of geological features and underground workings.
	Block Modelling	Tools for modelling and reporting material attributes in 3D.
	Block Model Interpolator	Multi-pass block model interpolation manager.
ENGINEERING	Grade Calculations	Calculate volumes and grades from polygons.
	Pit and Dump Design	Comprehensive open pit mine and dump design toolkit.
	Road Design	Basic road design toolkit featuring transition curves.
	Advanced Underground Design	Automated mine design process.
	Drill and Blast Design	Design, charge and report surface blasthole patterns.
	Underground Ring Design	Design, charge and report underground ring blasts.
SURVEY	Underground Sections	Create sections from floor and back polygonal data.
	Surface and Underground Surveying	Manage survey station data and interface with data collectors.
