

UNDERGROUND MINE PLANNING SOLUTION FOR **GEMCOM SURPAC**™

DESIGN

SCHEDULE

ANALYSE

Benefits:

- Automation is built into design and scheduling, freeing engineers from repetitive tasks so they can spend more time analysing and improving end results.
- Manual importing and exporting of data is eliminated as data flows seamlessly between design, scheduling and analysis, saving engineers time and reducing potential errors.
- Development precedence logic is built into designs which is automatically read and understood by the scheduling component.
- Schedule analysis capability allows engineers to interrogate and supplement the data used in development schedules.
- Gemcom's mining experts provide training and support for the whole solution.
